### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

- Claim 1, as the closest reference on record Ichiyama (JP 2000-014079A) shows a hub, **but fails to show** that the hub further includes: a fluid re-circulation hole formed therein at least partially aligning with the passage formed in the thrust plate.
- Claim 12, as the closest reference on record Ichiyama (JP 2000-014079A) shows a thrust plate and counter plate, **but fails to show** that the capillary seal is defined between an outer surface of the thrust plate and an inner surface of the counter plate.
- Claim 24, as the closest reference on record Ichiyama (JP 2000-014079A) shows a thrust plate and counter plate, **but fails to show** that the thrust plate further includes an outer surface, facing and diverging from an inner surface of the counter plate.
- Applicant asserts that in his invention, a divergent capillary seal is formed between the thrust plate and counter plate thereby allowing the shaft to extend beyond the counter plate and be coupled to the cover at a second end, thereby providing increase motor stiffness over conventional designs (Specification, [0011]).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
